### Prevention Strategies include:

**Information Dissemination** - This strategy provides awareness and knowledge of the nature and extent of alcohol, tobacco, and other drug use, abuse, and addiction and their effects on individuals, families and communities, as well as knowledge and awareness of available prevention programs and services. It is characterized by one-way communication from the source to the audience. Examples of activities are: resource directories, media campaigns, speaking engagements and health fairs.

**Education** - This strategy involves two-way communication and is distinguished from the information strategy by the fact that interaction between the educator/facilitator and the participants is the basis of its activities. Examples are: parenting classes, peer leader/helper programs, and small group sessions.

**Alternatives** - This provides for the participation of target populations in activities that exclude tobacco, alcohol and other drug. Examples include drug-free dances, youth/adult leadership activities and community service activities.

## **Substance Abuse Services Description**

**Problem Identification and Referral** - This strategy aims at identification of those who have indulged in illegal-inappropriate use of tobacco or alcohol and those individuals who have indulged in the first use of illicit drugs in order to assess if their behavior can be reversed through education. This does not include any activity designed to determine if a person is in need of treatment. Examples are: employee assistance programs, student assistance programs, and driving while under the influence programs.

**Community-Based Process** - This strategy aims to enhance the ability of the community to more effectively provide prevention and treatment services for tobacco, alcohol and other drug abuse disorders. Activities in this strategy include organizing, planning, enhancing efficiency and effectiveness of services implementation, interagency collaboration, coalition building, and networking.

**Environmental** - This strategy establishes or changes written and unwritten community standards, codes and attitudes, thereby influencing incidence and prevalence of the abuse of tobacco, alcohol and other drugs in the general population. This strategy is divided into two sub categories to permit distinction between activities which center on legal and regulatory initiatives and those that relate to service and action- oriented initiatives. Examples are: product pricing strategies, promoting establishment of alcohol, tobacco and drug use policies in schools and technical assistance to communities to maximize local enforcement procedures governing availability and distribution of alcohol, tobacco, and other drug use.

### Treatment Services include:

**Medically Managed Intensive Inpatient Detoxification** - Medically Managed Intensive Inpatient is a component of care, which provides persons having acute problems related to withdrawal from alcohol or other drugs with immediate assessment, diagnosis, medically monitored detoxification, and medical treatment for acute illness. The program provides for appropriate referral and transportation for continuing treatment. The program provides services on a 24-hour per day basis.

**Shelter** - Shelter is a service that provides food, lodging, and clothing for abusers of alcohol and other drugs, with the purpose of protecting and maintaining life and motivating them to seek substance abuse treatment. Shelter is a pre-treatment service usually operated in connection with a Detoxification component. At a minimum, shelter is provided 12 hours per day.

**Extended Shelter** - Extended shelter is a component which provides a structured therapeutic environment for clients who are on a waiting list for treatment, or who have either completed a detoxification program, or are otherwise not in need of detoxification services, and who need a social support system to enable them to remain sober for a period before returning to the community.

**Extended Care** - Extended care is a component that provides a long-term supportive environment for final-state substance abusers. The extended care component requires sustained abstinence and provides minimal treatment and ongoing living experience within the facility/program or re-entry into the treatment system. The term of residency is usually in excess of 180 days.

**Residential Rehabilitation** - Residential Rehabilitation is a component that provides substance abuse treatment services in a full (24 hours) residential setting. The Residential Rehabilitation component provides a scheduled therapeutic program that consists of diagnostic, educational, and counseling services; and refers clients to support services as needed.

**Halfway House** - Halfway House is a community-based, peer-oriented residential program that provides treatment and supportive services in a chemical free environment for persons involved in a recovery process. Programs are varied in character, each designed to relate to the target group served, taking into consideration the needs of the individual. The Halfway House addresses the cultural, social, and vocational needs of the clients it serves. Thus, the Halfway

## **Substance Abuse Services Description**

House program may offer services that vary in intent and intensity depending on the needs and nature of the persons it serves. The program provides transitional assistance in bridging the gap between substance abuse and society.

**Intensive Outpatient Treatment** - Intensive outpatient treatment is a component that provides an intensive and structured program of substance abuse evaluation, diagnosis, and treatment services in a setting that does not include an overnight stay. This component shall include both community-based nonresidential rehabilitation and partial capitalization programs. It includes programs generally described as "day treatment" and "intensive outpatient services." This component shall consist of a structured sequence of multi-hour clinical and educational sessions, scheduled for three or more days per week with a minimum of nine hours per week.

**Outpatient** - Outpatient is a component that provides assessment, diagnosis, treatment, and after-care services in a non-residential setting. These services may also be provided to the families of substance abusers and other concerned persons, whether or not the abuser is receiving treatment.
